

```
using System;

namespace Application.Utils
{
    public static class UrlUtil
    {
        public static bool CheckUrl(string url)
        {
            Uri uriResult;
            bool result = Uri.TryCreate(url, UriKind.Absolute, out uriResult)
                && (uriResult.Scheme == Uri.UriSchemeHttp || uriResult.Scheme == Uri.UriSchemeHttps);
            return result;
        }
    }
}
```
